

Software Quality Research Laboratory at McMaster University, Canada

- Alan Wassyng - wassyng@mcmaster.ca
- Acting Director, Software Quality Research Laboratory
- Department of Computing and Software. McMaster University, Hamilton, Ontario, Canada
- Specialty: Hard real-time / embedded systems - especially safety critical
- In general - develop software that users can trust
- Want collaboration with European researchers and industry - informal ties with SQRL at Limerick, Ireland - Dave Parnas

- We have a solid foundation and lots of (specific) industrial experience - methods based on Parnas' work, including tabular expressions

- What we want from partners:
 - ◆ Collaboration in developing industrial strength methods
 - ◆ Co-operation on both theoretical research and also application of the methods in industry
 - ◆ Academia: solutions to timing issues
 - ◆ Industry: applications that require high reliability
 - ◆ Application areas: medical devices, automobiles, aerospace, ...
